TALES IN TONES TRIO RELEASES DEBUT CD SUB SURFACE - MUSIC BY RALF SCHMID, VEIT HÜBNER and TORSTEN KRILL

“Filled with inspired young technique, emotions and sincerity” - **Nana Mouskouri**

A unique European approach of the classic jazz trio sound searching deepness and intensity, working out even smallest musical details and spicing it up with virtuosity and humor. The award-winning musicians present their newest works on their ObliqSound debut “Sub Surface”.

Tales in Tones Trio began in 1996: three friends sharing multiple musical influences enjoy exploring new territory within the traditional jazz trio format. The group rehearsed intensely. Two years later they won the 1st prize in the prestigious **Hennessy Jazz Search**.

Chamber Music is a key word for TTT: The members, educated well in classical music and in jazz find their audience not only in clubs but as well in classical music series, churches and concert halls.

After an intense working phase in an old farmhouse in the beautiful landscape of Tuscany, Italy, Tales in Tones Trio presents new compositions and improvisations recorded at **Studio “Klangküche”** in Stuttgart, Germany.
